Test Scenarios

Prepared by FusionHawk for Anarock Property Consultants Pvt. Ltd. Scope: repository fusionhawk/Anarock, main @ 21cf217 | Date: 2026-10-16

1. Approach

Scenarios cover the implemented features, the security defects found in this run, and SoW items still pending (marked 'pending'). P0 = must pass before go-live. No automated test suite currently exists; these should seed Playwright (UI/E2E) and API tests. Target launch per Slack project tracker: 2026-10-23.

Scope reference: *Anarock CLA Online Listing Platform Scope* (docx in repo). Zoho CRM org 'Anarock Property Consultants Pvt. Ltd' (production, Professional edition) was reachable through the AnarockCRM connector. This assessment is a static review of the code in the repository plus npm audit; no dynamic/penetration testing was performed.
