Test Scenarios and Execution Results

Prepared by FusionHawk for Anarock Property Consultants Pvt. Ltd. | Date: 2026-10-16 | Repository: fusionhawk/Anarock, branch main, commit 21cf217

1. Summary

34 scenarios were executed against the application running locally: **17 passed, 17 failed**. A further 12 scenarios are designed but **blocked** (they need Catalyst/Zoho credentials or a CRM sandbox) and 8 cover SoW items not yet implemented.

Activities performed in this run: (1) repository pulled; scope document fetched from Slack (file F0BP8478AE4) and compared with the repo copy - identical; (2) Zoho CRM inspected live through the AnarockCRM connector (read-only: organisation, module list, Leads and Properties field metadata, record counts, COQL reads); (3) all active API and library code read (comments stripped: about 5,000 lines in api/ and lib/) plus targeted reads of page components; (4) dependencies installed, npm audit, next lint and next build executed; (5) the app was started locally (next dev) with **no Zoho/Catalyst credentials**, so nothing could be written to production CRM, and exercised with curl and a headless Chromium (Playwright) at desktop and 375px mobile widths.

Limitations: no credentials or CRM sandbox were available, so flows that need live Data Store, Stratus or CRM writes (listing results, detail data, lead creation end-to-end, KYC and market-stats data) could not be executed and are marked *Blocked*. No load or third-party penetration testing was done. Each finding below states how it was verified.

2. Executed scenarios

ID	Area	Scenario	Expected	Result	Actual / note
T-01	Pages	GET /, /properties, /compare, /shortlist, /services, /list-your-property, /kyc/city/delhi	200, renders	Pass	All 200; render ok on desktop and 375px, no horizontal overflow
T-02	Pages	GET unknown route	404 page	Pass	404
T-03	Detail	GET /properties/abc/xyz (non-existent)	404 / not-found	Fail	HTTP 200, title 'xyz | Anarock' (S-09, C-08)
T-04	SEO	Home head tags	title, description, canonical, OG, Twitter, JSON-LD	Pass	All present; OG image hot-linked from unsplash
T-05	SEO	/properties served HTML contains listings	SSR content	Fail	Only 'Loading properties...' (C-06)
T-06	SEO	sitemap.xml URLs all resolve	All 200	Fail	/services&tools; and /list-property are 404; no property URLs (C-07)
T-07	SEO	robots.txt	Sitemap line, correct disallows	Fail	Valid but disallows /wishlist, real route is /shortlist
T-08	Security	Security response headers	CSP, HSTS, XFO, nosniff, Referrer-Policy	Fail	None present; X-Powered-By exposed (S-06)
T-09	Leads	POST /api/leads missing name	400	Pass	400 'Name is required'
T-10	Leads	POST /api/leads phone 'abc'	400 clear message	Pass	400 (message says 'required', misleading)
T-11	Leads	POST /api/leads invalid email	400	Pass	400
T-12	Leads	POST /api/leads text/plain	415	Pass	415
T-13	Leads	POST /api/leads malformed JSON	400	Fail	500 (C-10)
T-14	Leads	Honeypot field 'website' filled	Silent success, no CRM write	Pass	200 fake success

ID	Area	Scenario	Expected	Result	Actual / note
T-15	Leads	DELETE /api/leads	405	Pass	405
T-16	Leads	11+ requests/min from one client (/api/leads, /api/lead3)	429 from 11th	Pass	429 on 11th and 12th
T-17	Leads	Rotate X-Forwarded-For per request (/api/leads)	Still limited	Fail	12 of 12 accepted, no 429 (S-03)
T-18	Leads	15 requests to /api/lead2	429	Fail	No throttling (S-02)
T-19	Leads	/api/lead2 with phone 'not-a-phone', email 'notanemail', text/plain body	400 / 415	Fail	Accepted through to CRM step (S-02)
T-20	APIs	GET /api/exchange-rates	5 currencies	Pass	INR, AED, USD, EUR, SGD returned
T-21	APIs	GET /api/kyc without city	400	Pass	400
T-22	APIs	GET /api/wishlist without sessionId	400	Pass	400; stub returns empty items
T-23	APIs	POST /api/location lat 999	400	Pass	400
T-24	APIs	POST /api/location malformed JSON	400	Fail	500
T-25	APIs	/api/micromarkets when upstream credentials missing	Error status	Fail	200 success:true, empty list
T-26	APIs	/api/properties failure response	Generic error	Fail	Leaks 'CATALYST_PROJECT_ID is missing' (S-05)
T-27	Build	npm ci	Clean install	Fail	Lockfile out of sync (S-01)
T-28	Build	next lint	No errors	Fail	1 error, 4 warnings
T-29	Build	next build	Success	Fail	Failed to compile on lint error (C-01)
T-30	Security	npm audit	0 critical/high	Fail	13: 1 critical, 10 high, 2 moderate
T-31	A11y	Headings and field labels on 8 pages	h1 present, labelled fields	Fail	/services no h1; 3 unlabelled fields (C-12)
T-32	Responsive	8 pages at 375px	No horizontal scroll	Pass	No overflow
T-33	CRM	Leads field metadata vs fields written by code	All fields exist	Pass	All fields exist; picklist values off-list (C-13)
T-34	CRM	Properties flagged for website	Count > 0	Pass	293 of 7,279 (Push_to_Website)

3. Designed but blocked (need credentials / sandbox)

ID	Area	Scenario	Reason blocked
B-01	Search	Filter by city, type, micromarket; check counts, pagination, sort	Needs Catalyst Data Store credentials
B-02	Search	Min budget, area and seats boundary values (0, negative, huge)	Needs Data Store
B-03	Search	pageSize/page extremes; no-pagination call returns full catalogue	Needs Data Store
B-04	Detail	Gallery loads from Stratus; attributes; related properties	Needs Data Store and Stratus
B-05	Leads	Valid lead creates exactly one CRM lead with correct owner team	Needs CRM sandbox (production writes avoided)
B-06	Leads	Duplicate phone/email handling and what the response reveals (S-04)	Needs CRM sandbox
B-07	Leads	Shortlist enquiry creates Interested_Properties subform rows	Needs CRM sandbox
B-08	Currency	Switch currency in UI and verify converted prices	Needs property data
B-09	Compare/Wishlist	Add, remove, persist across reload with real data	Needs property data
B-10	KYC / Market	KYC pages and market stats with data	Needs Data Store
B-11	Cities	City and micromarket dropdowns from CRM	Needs Zoho credentials
B-12	Performance	Lighthouse mobile on built app	Blocked by build failure (C-01)

4. Pending scope items (to execute when built)

ID	Scenario	Status
P-01	Units switch ft/m/sq ft/sq m (SoW 5.2)	Not implemented
P-02	AI-assisted search returns relevant results	Not implemented
P-03	SalesIQ chatbot creates/updates CRM lead	Not implemented
P-04	PageSense and GA4 events, consent gating	Not implemented
P-05	Property view event increments count and CRM view score	Not implemented; CRM field missing
P-06	CRM approval triggers Stratus push, Gemini attributes, Data Store publish, page revalidation	Not implemented
P-07	Listing/detail JSON-LD validates in Rich Results Test	Not implemented
P-08	Search Console sitemap submission shows property URLs	Not implemented

5. Recommended automation

Convert section 2 into Playwright and API tests in CI (lint, build, npm audit, security headers, lead validation and throttling), and add section 3 against a Zoho CRM sandbox and a non-production Catalyst environment.
