Test Scenarios Report

Prepared by FusionHawk for Anarock Property Consultants Pvt. Ltd. | Date: 2026-10-16 | Repository fusionhawk/Anarock, main @ fcdc286 | Executed locally against the app started with no Zoho/Catalyst credentials

1. Summary

187 scenarios executed this run: 135 pass, 52 fail. HTTP/request tests (curl): 84 checks, 49 pass / 35 fail. Browser tests (Playwright, headless Chromium, desktop 1366px and mobile 375px, with axe-core): 103 checks, 86 pass / 17 fail. All failures were reproduced on this run's fresh install and are application defects except one check that needs data the sandbox does not have (marked Blocked). A further 18 designed scenarios could not be executed because they need Catalyst/Zoho credentials or a CRM sandbox, and 10 cover scope items that are not built yet (sections 5 and 6). Compared with the previous baseline (API 46 pass / 33 fail of 79; browser 86 / 17 of 103) the browser result is identical and the API result differs only by 5 new checks added this run (CORS x2, error leakage x2, path traversal).

2. Environment and tool versions (pinned so results are comparable week to week)

Item	Value
Target	Next.js 14.2.35 dev server on http://localhost:3111 started from a clean checkout; env contained no ZOHO_* or CATALYST_* variables (checked: 0 matches), NEXT_PUBLIC_BASE_URL=http://localhost:3111
Node / npm	Node 22.22.0, npm 10.9.4 (npm ci fails, so packages were installed with npm install in a scratch copy; src verified identical to the repo)
Browser tooling	playwright-core 1.56.1 with the preinstalled Chromium (/opt/pw-browsers/chromium); axe-core 4.10.2 (rules wcag2a, wcag2aa, wcag21a, wcag21aa)
HTTP tooling	curl 8.5.0, bash script reports/evidence/run_api_tests.sh (refuses non-local targets and requires CONFIRM_NO_CRM_CREDS=1)
Network	Outbound HTTPS from the app goes through the sandbox proxy (server started with NODE_USE_ENV_PROXY=1, CA bundle /root/.ccr/ca-bundle.crt, TLS verification on). With this setting the exchange-rate (Frankfurter) and location (Nominatim) calls succeed. In an intermediate attempt without the proxy those two routes failed (fetch failed): that was an environmental cause, not an app failure, and those results were discarded and re-run.
Isolation	The app's in-memory rate limiter keeps state between runs, so the server was restarted before each full run; results above are from one clean run.
Safety	No request could reach production CRM or Catalyst: the app has no credentials. All CRM/Catalyst access in this assessment was separate, read-only, through connectors.

3. HTTP/request tests (84 executed: 49 pass, 35 fail)

#	Group	Scenario	Result	Class	Expected / actual
1	PG	GET /	PASS	-	expected=200 actual=200
2	PG	GET /properties	PASS	-	expected=200 actual=200
3	PG	GET /compare	PASS	-	expected=200 actual=200
4	PG	GET /shortlist	PASS	-	expected=200 actual=200
5	PG	GET /services	PASS	-	expected=200 actual=200
6	PG	GET /list-your-property	PASS	-	expected=200 actual=200
7	PG	GET /kyc/city/delhi	PASS	-	expected=200 actual=200
8	PG	GET /kyc/city/mumbai	PASS	-	expected=200 actual=200
9	PG	GET /kyc/city/bengaluru	PASS	-	expected=200 actual=200
10	PG	GET /kyc/city/pune	PASS	-	expected=200 actual=200
11	PG	GET /kyc/city/chennai	PASS	-	expected=200 actual=200
12	PG	GET /kyc/city/hyderabad	PASS	-	expected=200 actual=200
13	PG	GET /kyc/city/kolkata	PASS	-	expected=200 actual=200
14	PG	GET /kyc/city/noida	PASS	-	expected=200 actual=200
15	PG	GET /kyc/city/gurugram	PASS	-	expected=200 actual=200
16	PG	GET /unknown-route	PASS	-	expected=404 actual=404
17	PG	GET /properties/abc/xyz (non-existent property) should be 404	FAIL	App defect	expected=404 actual=200
18	SEO	sitemap URL resolves: /	PASS	-	expected=200 actual=200
19	SEO	sitemap URL resolves: /properties	PASS	-	expected=200 actual=200
20	SEO	sitemap URL resolves: /services&tools	FAIL	App defect	expected=200 actual=404
21	SEO	sitemap URL resolves: /list-property	FAIL	App defect	expected=200 actual=404
22	SEO	sitemap contains property/detail URLs	FAIL	Blocked (needs Data Store)	expected=yes actual=no
23	SEO	sitemap domain equals request host (NEXT_PUBLIC_BASE_URL set)	PASS	-	expected=yes actual=yes
24	SEO	robots.txt references sitemap	PASS	-	expected=yes actual=yes
25	SEO	robots.txt disallow paths exist as routes (/wishlist)	FAIL	App defect	expected=200 actual=404
26	SEO	home has <title>	PASS	-	expected=yes actual=yes
27	SEO	home has name="description"	PASS	-	expected=yes actual=yes
28	SEO	home has rel="canonical"	PASS	-	expected=yes actual=yes
29	SEO	home has property="og:title"	PASS	-	expected=yes actual=yes
30	SEO	home has name="twitter:card"	PASS	-	expected=yes actual=yes
31	SEO	home has application/ld+json	PASS	-	expected=yes actual=yes
32	SEO	/properties HTML is server-rendered with listings (not 'Loading properties')	FAIL	App defect	expected=yes actual=no
33	SEO	property detail has its own meta description (differs from home)	FAIL	App defect	expected=yes actual=no
34	SEO	property detail JSON-LD is a listing type (RealEstateListing/Product/Offer)	FAIL	App defect	expected=yes actual=no
35	SEO	canonical of /properties points to itself (not homepage)	FAIL	App defect	expected=yes actual=no

#	Group	Scenario	Result	Class	Expected / actual
36	SEO	canonical of /properties/1/test-property points to itself (not homepage)	FAIL	App defect	expected=yes actual=no
37	SEO	canonical of /services points to itself (not homepage)	FAIL	App defect	expected=yes actual=no
38	SEO	canonical of /kyc/city/delhi points to itself (not homepage)	FAIL	App defect	expected=yes actual=no
39	SEO	canonical of /list-your-property points to itself (not homepage)	FAIL	App defect	expected=yes actual=no
40	HDR	header present: content-security-policy	FAIL	App defect	expected=yes actual=no
41	HDR	header present: strict-transport-security	FAIL	App defect	expected=yes actual=no

44	HDR	header present: referrer-policy	FAIL	App defect	expected=yes actual=no
45	HDR	header present: permissions-policy	FAIL	App defect	expected=yes actual=no
46	HDR	X-Powered-By not exposed	FAIL	App defect	expected=yes actual=no
47	XSS	slug with HTML is escaped in <title>	PASS	-	expected=yes actual=yes
48	XSS	/api/wishlist reflects sessionId only as JSON	PASS	-	expected=application/json actual=application/json
49	LEAD	missing name	PASS	-	expected=400 actual=400
50	LEAD	invalid phone	PASS	-	expected=400 actual=400
51	LEAD	invalid email	PASS	-	expected=400 actual=400
52	LEAD	wrong content-type	PASS	-	expected=415 actual=415
53	LEAD	malformed JSON should be 400	FAIL	App defect	expected=400 actual=500
54	LEAD	first name > 80 chars rejected	PASS	-	expected=400 actual=400
55	LEAD	60KB body with Content-Length rejected	PASS	-	expected=413 actual=413
56	LEAD	60KB chunked body (no Content-Length) should still be rejected	FAIL	App defect	expected=413 actual=400
57	LEAD	honeypot returns 200 (silent) without CRM call	PASS	-	expected=200 actual=200
58	LEAD	DELETE not allowed	PASS	-	expected=405 actual=405
59	LEAD2	invalid phone/email rejected with 400 (lead2)	FAIL	App defect	expected=400 actual=500
60	LEAD2	text/plain rejected with 415 (lead2)	FAIL	App defect	expected=415 actual=500
61	LEAD2	60KB body (valid name/phone) rejected with 413 (lead2)	FAIL	App defect	expected=413 actual=500
62	LEAD	60KB body (valid name/phone) rejected with 413 (/api/leads, control)	PASS	-	expected=413 actual=413
63	LEAD2	cross-origin text/plain POST (no CORS preflight) rejected	FAIL	App defect	expected=415 actual=500
64	LEAD3	invalid phone rejected (lead3)	PASS	-	expected=400 actual=400
65	RATE	/api/leads same client: 11th request is 429	PASS	-	expected=429 actual=429
66	RATE	/api/leads rotating X-Forwarded-For still limited	FAIL	App defect	expected=yes actual=no
67	RATE	/api/lead3 same client: 11th request is 429	PASS	-	expected=429 actual=429
68	RATE	/api/lead3 rotating X-Forwarded-For still limited	FAIL	App defect	expected=yes actual=no
69	RATE	/api/lead2 same client: limited	FAIL	App defect	expected=yes actual=no
70	API	exchange-rates 200	PASS	-	expected=200 actual=200
71	API	exchange-rates has INR,AED,USD,EUR,SGD	PASS	-	expected=yes actual=yes
72	API	kyc without city -> 400	PASS	-	expected=400 actual=400

#	Group	Scenario	Result	Class	Expected / actual
73	API	wishlist without sessionId -> 400	PASS	-	expected=400 actual=400
74	API	location lat out of range -> 400	PASS	-	expected=400 actual=400
75	API	location malformed JSON -> 400	FAIL	App defect	expected=400 actual=500
76	API	location valid coordinates (New Delhi) -> success:true city	PASS	-	expected=yes actual=yes
77	API	micromarkets upstream failure is not reported as success	FAIL	App defect	expected=no actual=yes
78	API	/api/properties error body must not disclose env var names	FAIL	App defect	expected=no actual=yes
79	API	/api/cities error body must not disclose env var names	FAIL	App defect	expected=no actual=yes
80	CORS	cross-origin GET to /api/properties does not echo Access-Control-Allow-Origin: *	PASS	-	expected=no actual=no
81	CORS	OPTIONS /api/leads does not allow arbitrary origin	PASS	-	expected=no actual=no
82	ERR	/api/properties/{id} error body must not disclose env var names	FAIL	App defect	expected=no actual=yes
83	ERR	/api/kyc?city=delhi error body must not disclose env var names	FAIL	App defect	expected=no actual=yes
84	ERR	path traversal in slug does not 500	PASS	-	expected=200 actual=200

4. Browser tests (103 executed: 86 pass, 17 fail)

Pages: /, /properties, /shortlist, /compare, /list-your-property, /services, /kyc/city/delhi and /properties/1/test-property at each viewport; checks: page load, no horizontal scroll, no console errors, axe-core WCAG 2.1 A/AA critical/serious, no internal env-var text visible to users, link crawl of internal links, target=_blank rel, cookie consent behaviour, lead CTA.

#	Viewport	Group	Scenario	Result	Class	Observed
1	desktop 1366px	PAGE	/ loads (HTTP 200, 2343ms)	PASS	-

5. Designed scenarios blocked (not executed)

ID	Scenario	Why blocked	What is needed
B-01	Search results by city / type / micromarket with real listings, pagination, sort	App has no Catalyst credentials; /api/properties returns the 'CATALYST_PROJECT_ID is missing' error	Catalyst project credentials for a test environment (Development Data Store holds 3 tables)
B-02	Property detail page shows attributes, gallery from Stratus, AI description	Same; no valid property ID	Credentials + a known property ID
B-03	Search suggestions and full-text search quality	Same	Credentials
B-04	Faceted filter counts and 'featured' ordering	Same (and Featured=true count is 0 in Production Data Store)	Credentials + featured rows
B-05	/api/leads end to end: lead appears in CRM with correct fields	Would write to production CRM (forbidden); no CRM sandbox	Zoho CRM sandbox + OAuth client
B-06	/api/lead2 end to end incl. client-chosen Lead_Source / Lead_Status	Same	CRM sandbox
B-07	/api/lead3 enquiry with Interested_Properties subform rows (Property_Name lookup)	Same; subform inner fields not exposed by field metadata	CRM sandbox
B-08	Duplicate-lead behaviour: overwrite and ID disclosure (S-04)	Same	CRM sandbox with seeded duplicate
B-09	City and micromarket dropdowns from CRM (36 cities, 94 micromarkets exist)	ZOHO_CLIENT_ID missing	CRM OAuth client
B-10	KYC city pages with data (9 KYC rows exist)	Data Store unreachable	Credentials
B-11	Market-stats widget values (Stats table has 1 row with seed defaults)	Data Store unreachable	Credentials
B-12	Compare 2-4 real properties; shortlist enquiry	No property data	Credentials
B-13	Currency and area-unit conversion on real prices	No property data (conversion helpers exist in format.js)	Credentials
B-14	Property images load from Stratus through next/image	No image paths without data; object listing not available via connector	Credentials
B-15	Production Slate site: HTTPS, response headers, caching, custom domain	Production Slate deployment failed; no site to test. Development sites (anarock-saxzjuvb.onslate.in, anarockpropertylisting.onslate.in) were not scanned (not part of the agreed local-only method)	Successful Production deployment
B-16	SEO: Rich Results Test / Search Console indexing of listing pages	No server-rendered listing HTML; external tools out of scope	SSR in place first
B-17	CRM -> Stratus -> Data Store sync and Published gating	No function deployed; mechanism not in repo	Deployed Functions + CRM sandbox
B-18	Stratus upload function (stratus_upload) behaviour and authentication	Function is_deployed=false in both environments	Deployment

6. Scenarios for scope items that are not built yet

ID	Scenario (from the SoW)	Status
N-01	AI-assisted semantic search returns relevant listings	Not built - no code
N-02	Catalyst Search faceted search and full-text	Not built - no code/config
N-03	Gemini attribute generation written back to CRM as draft; schema validation; human approval before Published	Not built - 1 of 7,295 CRM records has AI_Attributes_from_Images
N-04	SalesIQ chatbot answers, hands over to agent, creates CRM lead	Not built
N-05	PageSense heatmaps, recordings, funnels, form analytics	Not built
N-06	GA4 via GTM events (page views, property views, filters, gallery, chat, inquiry) gated by cookie consent	Not built - banner exists, nothing is gated by it
N-07	Property view event increments view count and CRM view score	Not built
N-08	On-demand revalidation when CRM data changes; scheduled sitemap regeneration	Not built - no cron, no revalidate calls
N-09	API Gateway throttles and authenticates app APIs	Not built - one rule for an undeployed function
N-10	Related-property recommendations quality (component exists, needs data)	Blocked + partial

7. Limitations and technical blocks

- Scenarios that require live Catalyst or Zoho data could not run (section 5); this is a credentials/sandbox limitation, not an app result.
- Tests ran against the Next.js dev server on a clean checkout, not a production build (a production build fails: see Code Review C-01). Timings are therefore indicative only.
- OWASP ZAP passive scan results are in the Security report; no active scan or load test was run.
- Automated accessibility checks cover a subset of WCAG; manual assistive-technology testing was not performed.
