Test Scenarios and Execution Results

Prepared by FusionHawk for Anarock Property Consultants Pvt. Ltd. | Date: 2026-10-16 | Repository: fusionhawk/Anarock, main (application code as of 21cf217; HEAD d2929ad)

1. Summary

194 checks were executed in this run: 138 passed, 56 failed. Every result is backed by a raw log in reports/evidence/ and the two test scripts are included so the run can be repeated. A further 12 scenarios are designed but blocked (credentials or a CRM sandbox needed) and 8 cover SoW items not yet built.

Suite	Executed	Pass	Fail
Tooling and scans (TL)	12	7	5
Scripted HTTP/API tests (08)	79	45	34
Browser tests, Playwright + axe (09)	103	86	17
Total	194	138	56

Activities performed (raw logs in reports/evidence/): (1) **GitHub pull** - git fetch/pull of fusionhawk/Anarock main, HEAD recorded (01_git_pull.log); (2) **Scope document** fetched from Slack (F0BP8478AE4) and compared with the repo copy - identical (11); (3) **Zoho CRM** inspected live, read-only, via the AnarockCRM connector: org, modules, Leads/Properties field metadata, record counts, COQL reads (10); (4) **Security checks**: npm audit (02); secret scan of all 131 tracked files and the full git history, 46 commits and 702,433 added lines (05); Semgrep SAST with 108 rules over 105 files, scanner proven on a known-bad canary file (06); GitHub secret-scanning attempted (07); manual review of all active API/lib code (about 5,000 lines, comments stripped); (5) **Build checks**: npm ci, next lint, next build (02-04); (6) **Request tests**: 79 scripted HTTP checks against the running app (08, script run_api_tests.sh); (7) **Browser tests**: 103 Playwright checks at 1366px and 375px including axe-core accessibility, link crawl and cookie checks (09, script run_browser_tests.js). The app ran locally with **no Zoho/Catalyst credentials**, so no request could reach production CRM.

Limitations: no credentials or CRM sandbox were available, so flows that need live Data Store, Stratus or CRM writes (listing results, detail data, lead creation end-to-end, duplicate-lead behaviour, KYC and market-stats data) could not be executed and are marked *Blocked*. SAST found no injection-class issues, but the main findings here are logic and design flaws that pattern-based tools do not detect. No load testing or external penetration test was done.

2. Tooling and scan checks

ID	Check	Result	Detail (evidence log)
TL-01	GitHub pull (git fetch/pull origin main)	Pass	Already up to date at d2929ad (01)
TL-02	npm audit	Fail	13 advisories: 1 critical, 10 high, 2 moderate (02)
TL-03	npm ci (clean install)	Fail	lockfile out of sync (02)
TL-04	next lint	Fail	1 error, 4 warnings (03)
TL-05	next build	Fail	Failed to compile on lint error (04)
TL-06	Secret scan - 131 tracked files	Pass	0 hits (05)
TL-07	Secret scan - full git history (46 commits, 702,433 added lines)	Pass	0 hits; no .env/.pem/.key ever committed (05)
TL-08	Semgrep SAST (108 rules, 105 files; canary self-test detected 4 planted issues)	Pass	0 findings (06)
TL-09	GitHub secret scanning / push protection enabled	Fail	Advanced Security not enabled on repo (07)
TL-10	Scope document: Slack copy equals repo copy	Pass	identical, 12,835 chars (11)
TL-11	CRM fields written by the app exist in Leads	Pass	all exist; picklist values off-list (10)

ID	Check	Result	Detail (evidence log)
TL-12	CRM property data ready for website sync	Pass	Push_to_Website 293 of 7,279; view-score field absent (10)

3. Results by area

Scripted HTTP/API tests:

Area	Pass	Fail
PG	16	1
SEO	9	13
HDR	0	7
XSS	2	0
LEAD	9	2
LEAD2	0	4
LEAD3	1	0
RATE	2	3
API	6	4

Browser tests:

Area	Pass	Fail
PAGE	16	0
LAYOUT	16	0
JS	16	0
UI	10	6
A11Y	9	7
LINK	15	4
SEC	1	0
COOKIE	2	0
FORM	1	0

4. All failed checks (from logs 08 and 09)

Area	Check	Actual
PG	GET /properties/abc/xyz (non-existent property) should be 404	expected=404 actual=200
SEO	sitemap URL resolves: /services&tools;	expected=200 actual=404
SEO	sitemap URL resolves: /list-property	expected=200 actual=404
SEO	sitemap contains property/detail URLs	expected=yes actual=no
SEO	sitemap domain equals request host (NEXT_PUBLIC_BASE_URL set)	expected=yes actual=no
SEO	robots.txt disallow paths exist as routes (/wishlist)	expected=200 actual=404
SEO	/properties HTML is server-rendered with listings (not 'Loading properties')	expected=yes actual=no
SEO	property detail has its own meta description (differs from home)	expected=yes actual=no
SEO	property detail JSON-LD is a listing type (RealEstateListing/Product/Offer)	expected=yes actual=no
SEO	canonical of /properties points to itself (not homepage)	expected=yes actual=no
SEO	canonical of /properties/1/test-property points to itself (not homepage)	expected=yes actual=no
SEO	canonical of /services points to itself (not homepage)	expected=yes actual=no
SEO	canonical of /kyc/city/delhi points to itself (not homepage)	expected=yes actual=no
SEO	canonical of /list-your-property points to itself (not homepage)	expected=yes actual=no

Area	Check	Actual
HDR	header present: content-security-policy	expected=yes actual=no
HDR	header present: strict-transport-security	expected=yes actual=no
HDR	header present: x-frame-options	expected=yes actual=no
HDR	header present: x-content-type-options	expected=yes actual=no
HDR	header present: referrer-policy	expected=yes actual=no
HDR	header present: permissions-policy	expected=yes actual=no
HDR	X-Powered-By not exposed	expected=yes actual=no
LEAD	malformed JSON should be 400	expected=400 actual=500
LEAD	60KB chunked body (no Content-Length) should still be rejected	expected=413 actual=400
LEAD2	invalid phone/email rejected with 400 (lead2)	expected=400 actual=500
LEAD2	text/plain rejected with 415 (lead2)	expected=415 actual=500
LEAD2	60KB body (valid name/phone) rejected with 413 (lead2)	expected=413 actual=500
LEAD2	cross-origin text/plain POST (no CORS preflight) rejected	expected=415 actual=500
RATE	/api/leads rotating X-Forwarded-For still limited	expected=yes actual=no
RATE	/api/lead3 rotating X-Forwarded-For still limited	expected=yes actual=no
RATE	/api/lead2 same client: limited	expected=yes actual=no
API	location malformed JSON -> 400	expected=400 actual=500
API	micromarkets upstream failure is not reported as success	expected=no actual=yes
API	/api/properties error body must not disclose env var names	expected=no actual=yes
API	/api/cities error body must not disclose env var names	expected=no actual=yes
A11Y	/ axe: no critical/serious WCAG2.1 A/AA violations	aria-required-parent(critical,2), color-contrast(serious,3) | all: aria-required-parent:2,color-contrast:3

5. Designed but blocked (need credentials / sandbox)

ID	Area	Scenario	Reason blocked
B-01	Search	Filter by city, type, micromarket; check counts, pagination, sort	Needs Catalyst Data Store credentials
B-02	Search	Min budget, area and seats boundary values (0, negative, huge)	Needs Data Store
B-03	Search	pageSize/page extremes; no-pagination call returns full catalogue (S-07)	Needs Data Store
B-04	Detail	Gallery loads from Stratus; attributes; related properties	Needs Data Store and Stratus
B-05	Leads	Valid lead creates exactly one CRM lead with correct owner team	Needs CRM sandbox (production writes avoided)
B-06	Leads	Duplicate phone/email: existing lead overwritten? what does the response reveal (S-04)	Needs CRM sandbox
B-07	Leads	Shortlist enquiry creates Interested_Properties subform rows	Needs CRM sandbox
B-08	Currency	Switch currency in UI and verify converted prices	Needs property data
B-09	Compare/Wishlist	Add, remove, persist across reload with real data	Needs property data
B-10	KYC / Market	KYC pages and market stats with data	Needs Data Store
B-11	Cities	City and micromarket dropdowns from CRM	Needs Zoho credentials
B-12	Performance	Lighthouse mobile on a production build	Blocked by build failure (C-01)

6. Pending scope items (execute when built)

ID	Scenario	Status
P-01	Units switch ft/m/sq ft/sq m (SoW 5.2)	Not implemented
P-02	AI-assisted search returns relevant results	Not implemented
P-03	SalesIQ chatbot creates/updates CRM lead	Not implemented
P-04	PageSense and GA4 events, consent gating	Not implemented
P-05	Property view event increments count and CRM view score	Not implemented; CRM field missing
P-06	CRM approval triggers Stratus push, Gemini attributes, Data Store publish, page revalidation	Not implemented
P-07	Listing/detail JSON-LD validates in Rich Results Test	Not implemented
P-08	Search Console sitemap submission shows property URLs	Not implemented

7. Re-running the tests

CONFIRM_NO_CRM_CREDS=1 bash reports/evidence/run_api_tests.sh http://localhost:3111 and NODE_PATH=<dir with playwright-core and axe-core> node reports/evidence/run_browser_tests.js http://localhost:3111. Start the app without Zoho/Catalyst environment variables so lead payloads that pass validation cannot reach production CRM. The scripts refuse to run against non-local targets.
